

d.3 - The Solution.

d.velop AG

d.velop AG, founded in 1992 and headquartered in Gescher, Germany, improves document-based business and decision processes by means of IT solutions. The high quality prevailing in all projects that have already been realized is based upon the comprehensive knowledge of the more than 250 staff members at d.velop AG, at the d.velop competence centers as well as at the 60 globally operating partner companies in the d.velop competence network. More than 1,500 customers comprising more than 500,000 users are enthusiastic about d.3.

d.3

d.3 integrates archiving, document and workflow management functionalities into one groundbreaking solution.

The self-made portfolio comprises all software components necessary for easy processing, structured management and revision-proof archiving of documents.

Using appropriate connections, d.3 can be smoothly integrated into existing systems. d.3 uses state-of-the-art technologies and standards and thus provides its customers high protection of investment.

d.velop

Archiving

We keep your documents safe! d.3 is a highly scalable archiving system with a hierarchical storage concept. In this way, revision-proof archiving for time periods of 30 years or more can be guaranteed. Moreover, rapid access to all documents in the archive becomes possible.

Cold

Keep cool! Mass data is instantly archived! Commercial applications on different computer systems, from a host system to PCs, generate large quantities of receipts for outgoing products, printing lists and technical documents every day. When using d.3, archiving of mass data takes place rapidly, in a secure and cost-efficient way.

Knowledge Management

Finding – instead of searching! The d.3 search option, which takes advantage of technologies also used by our human brain, provides a rapid overview of large, unstructured information quantities to your staff members. In this way, it permits evaluating existing information in a new and interesting way.

Document Management

Keep track of your documents! Which version of the QM manual is the most recent one? When did we edit the contract? d.3 logs the life cycle of all documents and provides an up-to-date overview of versions and history at any point in time.

E-Mail Management

Master the overload! The transaction-oriented storage of all e-mails in virtual, electronic d.3 record structures provides a transparent overview of all information. Just as a matter of course, you will relieve your Microsoft, Lotus or Novell mail server.

Storage Management

Store your data and documents correctly right from the beginning! With d.3, data is automatically stored on the most suitable, most cost-efficient storage media – CAS, SAN or NAS. This helps saving costs and enthruses users.

Workflow Management

Get your workflows moving! Accelerate them digitally! With the d.3 system, you will automate business processes that so far have been really time-consuming – specifically tailored to your organization. In this way, you will save expenses and grant your staff members more time to concentrate on their core task – servicing the customer.

Records Management

You may calmly look forward to your tax inspection! Electronic records are the basis of d.3. Integrated record plans ensure the automatic, correct and comprehensible storage of information from e.g. ERP systems. At the same time, all legal requirements are met – a fact regularly verified by independent auditors.

Office Management

Master your digital data stream! MS Sharepoint, MS Word, MS Excel and also fax – data, documents and information get to your staff members by diverse channels. d.3 intervenes into your applications, directs the information flow correctly and ensures that your staff members do not get lost in the data stream.

d.3 - The Solution.

You think one topic is missing? Do you have any specific requirement?

With d.3, we have already served many different customers and have met diverse requirements. Requirements are a challenge to us.
